

Campus-Wide Impact

Mission 1: Conduct Policy-Relevant Research

Our areas of research include Crime and Justice Policy, Environmental Policy, Health Policy, Politics and Policy, Social and Education Policy, and Transportation and Vehicle Safety Policy.

Mission 2: Support Social Science Research

Grant searches, pre- and post-award support, data collection, survey and analysis consultations, and training are part of what we offer through the Iowa Social Science Research Center.

Mission 3: Engage and Share Knowledge with Policymakers and the Public

We share knowledge through journal articles, reports, presentations, and policy briefs. Symposia and guest speakers provide a forum for dialogue about policy areas from applied, academic, and interdisciplinary perspectives. We host Lunch & Learns and special events, such as "Free Speech and Social Media."

Mission 4: Impact Student Success

Graduate and undergraduate students from a wide variety of disciplines are engaged in experiential activities in applied research, administration, and engagement. We support Explore Iowa and Life Design - courses for undergraduate students to explore their community and discover what they are innately drawn to. We also support courses in Criminology policy and mentoring.
